J&J Technology Consulting Inc.

The J&J Technology Consulting team is comprised of highly skilled individuals focused on client satisfaction. The extensive knowledge within the team allows for specialized expertise, no matter what the project needs may require.

We offer network solutions to meet your needs. From ground up network topology design, to simple server migration, rotation and/or addition, we help you manage your network and apply our experience to help you succeed.

Our team also has extensive experience in application development. By utilizing industry standard development tool sets, we customize applications to your specifications and provide detailed documentation along the way.
