

Software Development

In order to achieve fast results in the least amount of time, our team practices industry standard project management methods to gain a full understanding of the task at hand. Understanding that time is money; time is devoted at the initial visit to understand business requirements that are later compiled into possible options via a proposal document(s). Documentation is crucial and key to obtaining mutual buyin prior to starting a development project.

- **MS Visual Basic 6.0**
- **Custom reports**
- **MS VBA**
- **Web Development**
- **Microsoft SQL 2000**
- **Tables/Views**

- **Specialized Applications**
- **Microsoft Access**
- **Process Macros**
- **PHP**
- **Database design**
- **Crystal**

- **SQL/Access back-end**
- **All in one applications**
- **Back-end configuration**
- **ASP**
- **Stored Procedures**
- **Data Transformation Services (DTS)**
